Profile

I turn ideas into video that is clear on the first second and worth finishing.

Seven years in design have taken me through studios and teams working on very different subjects: news and social channels, advertising, YouTube, interiors, e-commerce and animation.

I handle the whole chain: concept and storyboard, editing, motion graphics, sound, thumbnails and delivery. I use AI tools where they save time, and keep timing, taste and final sound in my own hands.

For studios and brands that means one reliable person who understands formats, templates and brand rules, and delivers files as agreed.

Range

Comfortable in very different genres and visual languages.

Pipeline

From script to finished file, with AI-assisted tools where they help.

Reliability

Briefs, templates and formats are respected; deliveries are clean.

Skills & tools

Editing & motion

- After Effects
- Premiere Pro
- Titles & subtitles
- Sound design & mix
- Colour correction

3D

- Blender
- Procedural environments
- Lighting & render

Image & design

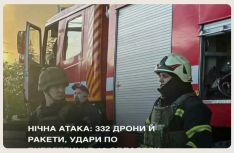

- Photoshop
- YouTube thumbnails
- Retouch & compositing
- E-commerce infographics

AI & automation

- ComfyUI / Stable Diffusion
- ElevenLabs
- Remotion
- Lip-sync & AI video

After Effects · Premiere Pro · Photoshop · Blender · Remotion · ComfyUI / Stable Diffusion · ElevenLabs

Experience by field

News & social channels

Vertical news shorts built to channel templates, with voice-over and sound, delivered fast.

Advertising & creatives

Square and vertical ad creatives, kinetic typography and product promos.

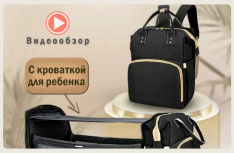

YouTube channels & thumbnails

Whole-channel production plus high-contrast covers designed to be clicked.

Furniture & interiors

Reveal reels that turn a construction site into the finished design.

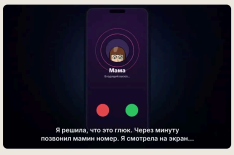

E-commerce infographics

Product cards and infographics for marketplaces.

3D & AI animation

Blender environments, 2.5D comic animation and AI-assisted pipelines.

Animated stories

Script, voice, animation and sound for long-form mystery stories.

Selected work

Eight of eleven projects on the portfolio site. Video, case notes and the latest work are online.
